

6m WIDE MULTI-SPAN MARQUEES - 2016

Marquees have long been the ideal solution for temporary outdoor cover. Nowadays new materials make them more affordable, easily transportable and quick and easy to erect

FUNCTIONALITY

This marquee is manufactured in 17 different sizes! And if you find that you need a smaller or larger marquee at a later date, the multi-span option offers the degree of flexibility you need. For example, if you have purchased a 6m x 6m structure but now find that a 6m x 10m would be more suitable, you can purchase a 6m x 10m canopy (roof) to make your marquee bigger. It comes with a manufacturer's quality guarantee, including a 7-day warranty.

Sidewalls are made up of linked 2m bays with each bay having its own zipped side panel, which can be detached to create an opening anywhere around the marquee. Each wall incorporates large Georgian style windows in its side panels. The vertical side walls mean it can stand flush with adjoining buildings to maximise floor space as required. The side walls also have 15cm/6" side skirts to promote better water run-off and drainage. The frame simply slots together and each leg comes complete with a base plated that can be pegged, bolted or weighted, or fitted to base bars.

SAFETY NOTE

We recommend that you anchor your marquee during even the calmest weather conditions using a combination of tie down kits, steel stakes. Use weights and ground bars when on hard ground.

DURABILITY

The range of marquees is built to last. Note the key features and specification

- ✓ 350g polyethylene UV-stabilised tarpaulin cover (canopy only)
 - ✓ British fire-rated to BS 5438 and BS 7837
- ✓ Georgian style window panels with a blind ✓ Heavy duty brass eyelets
 - ✓ Industrial duty zips on the front and side entry panels
 - ✓ Strong 44mm tubular steel frame and 44mm corner joints
 - ✓ Powder-coated framework ✓ Tube wall thickness 1.2mm
 - ✓ 3 Zips on each end panel for 3 different size door entries
- ✓ Locating / retaining screw at each joint for stability and strength
 - ✓ Heavy-duty Velcro and bungee cord straps
 - ✓ Full instructions and care manual

Height Dimensions: Eve Height: 205 cm ; Centre Apex Height: 370cm
