MARQUEES FOR PARTIES,
SHOWS AND EVENTS
FOR HIRE AND FOR SALE

The 9x9m Fusion - A New Generation of Clearspan Marquee

Speed, strength, safety and simplicity – with extra width!

Marquees have long been the ideal solution for temporary outdoor cover. Nowadays new materials make them more affordable, easily transportable and quick and easy to erect

FUNCTIONALITY

Dreamed up to fill the mid-range gap in commercial marquees in the event industry, **The Fusion** takes key attributes from both the entry-level Party-Tent and from high-end modular marquees, to become **the best-selling 9m marquee in Britain** today!

The Fusion can be located on most surfaces including tarmac, concrete and grass. The lightweight frame makes it quick, simple and safe to erect, with no special skills or tools required. 3-4 people can do it!

FEATURES

The Fusion marquee is 9m wide! Perfect for weddings, markets and other large gatherings

The side-walls are made up of linked 3m bays with each bay having its own 'Dutch-laced' side panel, which can be detached to create an opening anywhere around the marquee. Each wall incorporates large Georgian style windows with roll-down blinds. The vertical side walls mean it can stand close to adjoining buildings to maximise floor space as required.

- ✓ Frames: high-grade aluminium extrusions provide strength whilst minimising weight
- ✓ Frame: Hard pressed extruded aluminium 6061/T6 ; Main Pole size: 60x46x2.5mm
